

# GROW TENT REPAIR TAPE

Grow tent repair tape was designed to fix rips and tears in the skin of the grow tent. Utilize this silver tape on the inside of a tent to get it back up and running. Follow the three simple steps below to fix any rip or tear in your tent skin. Note: tape must be adhered to the silver inner lining not the canvas outer lining.

**STEP 1:** Peel the blue backing off of the tape.

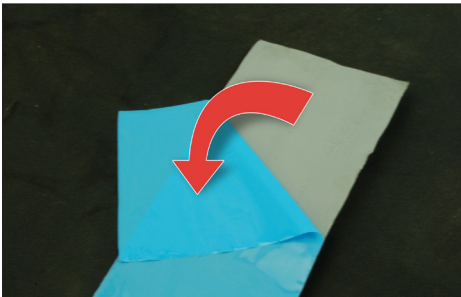

**STEP 2:** Locate the rip or tear on the inside of the grow tent skin. (Silver Side)

**STEP 3:** Firmly press the tape over top of the tear to bond the skin back together.
