Base Nutrients

Customized Performance

BioThrive® Grow 4-3-3
provides plants with essential nutrients for roots, stems, and foliage.

BioThrive® Grow 2-4-4
offers flowering and fruiting plants essential nutrients for superior blooms and bountiful harvests.

CaMg+
is a blend of calcium and magnesium. Helps optimize plant nutrition resulting in enhanced growth and vibrant flowers and fruits.

BioRoot® 0-1-1
Helps plants establish vibrant, vigorous root systems.

BioWeed® 0-0-0.5
a plant and soil vitality booster featuring cold processed seaweed.

BioBud® 0.5-0-1
encourages profuse flowering and vigorous fruit development.

BioMarine® 2-3-1
a soil amendment that contains humic acids aiding in micronutrient uptake.

Diamond Black®
contains digested squid protein that boosts plant growth.

Most products available in 1 quart, and 1, 2.5, 6, 15, 55 and 275 gallon sizes. Visit generallyhydroponics.com for more details.

Aggressive feed is most suitable for:

- ≤1 irrigation event per day during peak production
- >#5 pot size, slow drybacks
- Low planting density
- Large, multi-topped cropping style

Medium feed is most suitable for:

- 1-5 irrigation events per day during peak production
- #2-5 pot size, intermediate drybacks
- Intermediate planting density
- Intermediate, topped/pinched cropping style

Light feed is most suitable for:

- >5 irrigation events per day during peak production
- 4", 6", #1 pot or block size, fast drybacks
- High planting density
- Small, untopped crops: sea of green style

Feeding charts are recommendations only. Adjustments may be needed based upon environmental conditions, individual grow structure, and use of additional products. Actual results may vary.
