**APPLICATION INSTRUCTIONS**

May be mixed directly into feed water or mixed in stock tanks for fertigation systems. For every 1 gram of Pro Bloom, use 0.6 grams of Pro Core to reach desired EC level. Measure desired amount by weight not by volume. Do not combine with other fertilizers in dry form or concentrate solution. Use warm water to dissolve more quickly. Recommended for hydroponic use only.

**CONCENTRATE MIXING**

Mix your stock tanks at the same concentration to minimize errors. We recommend 2 lbs per gallon. Adjust injection ratio to vary EC.

**PRECAUTIONARY STATEMENTS**

Hazardous to humans and animals. Causes eye and skin irritation. When mixing and applying wear appropriate protective clothing. Refer to the SDS for detailed information on hazards, precautionary statements, and first aid instructions.
