The PureCrop1 logo features the brand name in a serif font, with a green leaf icon above the 'C' in 'Crop'. The logo is enclosed in a thin green rectangular border.

Premium Agriculture Formula for
Valuable Plants and Crops

ABOUT US

PureCrop1 is advance biochemistry using plant based ingredients to create a product that is part biostimulant, part insecticide and part fungicide. Our goal is to reduce the amount of toxic chemicals used in the field and promote sustainable agriculture.

—
PureCrop1 was developed over a decade ago and has been successfully field tested on a variety of food crops, ornamentals, conifers hemp, and cannabis.

Although it is made from oils, it is in fact not an oil, it's a clever rearrangement of nanoscale molecules and their electrical charge

—
Nanotechnology that improves plant health through increased brix levels

—
Can be applied as a foliar spray or root drench

—
1-2 oz per gallon dilution for most applications

—
Gentle enough for young plants, seedlings and sensitive varieties

—
A natural emulsifier that is compatible with all other garden products

—
Easily implemented into current IPM

COLLOIDAL CHEMISTRY

100% GREEN

Colloidal micelle are created naturally using food grade oils and organic acid

Our formula utilizes renewable plant based materials such as grains, beans, and citrus

100% CLEAN

Solid particles are attracted to the micelle and held in suspension. The wash off is completely biodegraded at the atomic level into nitrates, soil constituents and water

0% WASTE

The unique ability of the micelle to encapsulate means nutrients are carried throughout the plant more efficiently

All of our packaging is reusable and recyclable
